PROFESSIONAL SUMMARY

Results-driven Computer Science undergraduate with strong expertise in **Machine Learning, Full-Stack Development, and Scalable Systems**. Experienced in building production-ready applications, contributing to open-source platforms with global usage, and transforming data into actionable insights. Adept at collaborating in fast-paced engineering teams while delivering reliable, maintainable, and performance-oriented solutions aligned with business objectives.

EDUCATION

Vidyavardhini's College of Engineering and Technology

Mumbai, India

Bachelor of Engineering in Computer Science — CGPA: 8.1

2023 – 2027

- **Relevant Coursework:** Data Structures & Algorithms, DBMS, Operating Systems, OOP, Machine Learning, Computer Networks

PROJECTS

EvalAI | Python, Django, Docker, Redis, Celery

Open Source Contribution

- Contributed to a large-scale open-source AI evaluation platform supporting **450+ active competitions** used by research teams worldwide.
- Gained hands-on experience with Docker-based evaluation workflows used for large-scale ML benchmarking across multiple domains.
- Improved system maintainability by resolving GitHub issues, refining documentation, and assisting contributors across multiple repositories.

Customer Segmentation Engine | Python, Scikit-learn, Pandas, Matplotlib

2025

- Built a machine learning pipeline to analyze purchasing behavior across **200+ customer records** using structured retail data.
- Applied **K-Means clustering** to identify **4 distinct customer segments**, improving behavioral interpretation and targeting.
- Engineered and analyzed **6+ numerical features** including income, spending score, and age for improved clustering quality.
- Generated clear visual insights through 2D cluster plots and analytical summaries to support business-level decision making.

EXPERIENCE

AXIOIL

Jun 2025 – Nov 2025

Software Engineering Intern (Web & Infrastructure)

Mumbai, India

- Developed and optimized **6+ responsive UI components** used across internal dashboards and client-facing modules.
- Contributed to **8+ feature updates** by collaborating with designers and backend engineers in an Agile environment.
- Improved frontend performance by optimizing asset loading and component rendering, enhancing user experience across devices.
- Assisted in debugging and stabilizing production workflows, reducing recurring UI issues and improving release reliability.

TECHNICAL SKILLS

Languages: Python, C++, JavaScript, SQL (PostgreSQL/MySQL), HTML/CSS

Machine Learning: PyTorch, Scikit-learn, Pandas, NumPy, Matplotlib, Seaborn, Supervised & Unsupervised Learning

Frameworks & Libraries: Django, Flask, React.js, Bootstrap

Developer Tools: Git, GitHub, Docker, Postman, VS Code, Linux/Unix

Core Concepts: Data Structures & Algorithms, DBMS, System Design Basics, REST APIs, CI/CD

LEADERSHIP & ACHIEVEMENTS

Deputy AIML Lead, Google Developer Group (VCET): Led workshops and technical sessions impacting **100+ students**.

Deputy Organizing Lead, CSI VCET: Coordinated logistics and execution of multi-team technical events.

District-Level Chess Player: Demonstrated strategic thinking, decision-making under pressure, and competitive discipline.

Driven to contribute meaningfully to organizational goals by building scalable AI solutions and continuously growing alongside the company's vision.
